ARRAY METHODS

JOIN():-

The `join()` method also joins all array elements into a string.

Syntax:-

array.join(*separator*)

ex:-

```
var a=[1,2,3,4,5,6,7,8];

 console.log(a.join("&"));
```

POP:-
Removes the last element of an array, and returns that element

Syntax:-

array.pop()

ex:-

```
var a=[1,2,3,4,5,6,7,8];

a.pop();

 console.log(a);
```

PUSH:-
Adds new elements to the end of an array, and returns the new length

Syntax:-

array.push(*item1, item2, ..., itemX*)

ex:-

```
var a=[1,2,3,4,5,6,7,8];

a.push(1,2,3);
console.log(a);
```

Unshift:-

Adds new elements to the beginning of an array, and returns the new length

Syntax:-

```
array.unshift(item1, item2, ..., itemX);
```

ex:-

```
var a=[1,2,3,4,5,6,7,8];
```

a.unshift(11,22,23);

console.log(a);

shift:-

Removes the first element of an array, and returns that element

Syntax:-

```
array.shift()
```

Ex:-

```
var a=[1,2,3,4,5,6,7,8];
```

a.shift();

console.log(a);
